

LOOP FITNESS — INTELLIGENT WORKOUT SYSTEM

Upgraded 10-Exercise Slot Architecture, Dynamic Rest Periods & 24 Workout Catalog (ACSM 2026)

1. Core Programming Principles & 10-Slot Block Architecture

Loop Fitness is upgraded from fixed-rest circuits to an evidence-based **10-Slot Intelligent Training System**. Each session contains exactly 10 distinct movement slots distributed across 6 periodized blocks without redundant overlap: **Block 1:** Primary Compound (2 slots), **Block 2:** Superset A1+A2 (2 slots, 15s transition + 60s recovery), **Block 3:** Superset B1+B2 (2 slots), **Block 4:** Accessories (2 slots), **Block 5:** Core & Anti-Rotation (1 slot), and **Block 6:** High-Output Finisher (1 slot). Rest is context-aware: 90-180s for heavy strength, 60-90s for superset pairs, 30-45s for accessories, and work:rest ratios for conditioning.
